'Holiday for the senses!'

The architecture and layout of this new hotel is based on the ancient Chinese principles of Feng Shui. The result is an attractive mixture of the five earth elements (water, wood, fire, earth and metal), their corresponding colours and a wonderful cuisine, which together offer a feast for the senses. Freshness, harmony with the environment and the soft blending of colours are the prime objectives. This philosophy is based on the principle that human beings should live in harmony with themselves and their surroundings.
